

Specifications

Hatec S-50, Sun protection rigid louvre boards

Louvre boards are made out of extruded, corrosion-resistant AlMg Si 0,5 aluminum profiles.

And are producable in ellipse or pallalelogramm shape.

Because of different elongations and with it related noises if you are undivided to mount in one piece, don't use several materials, especially not with a steel core.

Every fixation part must be stainless.

Louvre boards are delivered with Aluminum end caps and bearing bolts and suburban screwed with fixing screws.

The bending may only be 1/200 of the louvre board length tops with complete snow and wind load.

The snow and wind loads are ÖNORM for the Wien space, are to be consulted.

Louvre board typ	: Ellipse or Parallelogramm
